Answer the following questions about your topic:

### **What Problem Does it Solve?**

*This is probably the main sales pitch of the product - why do the creators think this is useful?*

### **What Is Innovative About It?**

*What makes this device different or better than other solutions out there?*

### **How Do You Interact With It?**

*Focusing on the Input and Output elements of our model for a computer, how does this device take input from the user, and how does it display output? Try to be as specific as possible.*

### **How Could You Improve It?**

*What are some changes that could make this device better? Are there common complaints, or clear issues that you might be able to address?*
